

Swim Stairs

Stepping into crystal-clear blue waters is one of yachting's great pleasures and C-Quip's swim stairs make it effortless.

At the touch of a button, hydraulic stairs - which are housed inside the swim platform - gently lower into the water. Wide non-slip teak steps and a 20 degree incline make it easy for everyone to use. And the carbon fibre frame means they are lightweight and durable too.

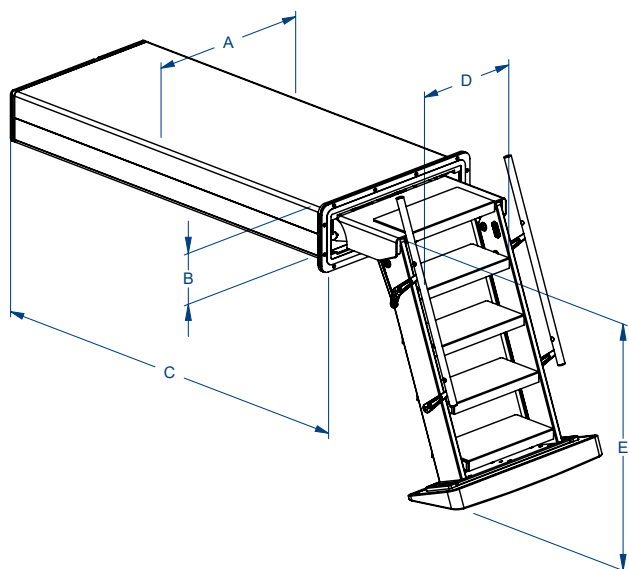

Key benefits

- Lightweight non-corroding materials
- Push button operation
- Self-deploying handrails
- Watertight housing
- Integrated wash-down system
- Custom sizes

Easy storage

C-Quip's swim stairs are easy to operate and ergonomically designed. Press a button and they smoothly extend down into the water. Then after your swim, the stairs retract neatly to be housed within your vessel's swim platform.

Key measurements

Construction

Stairs:

Carbon fibre pre-impregnated monocoque construction

Housing and Fittings:

316 stainless steel

Paint finish:

Clear coat carbon fibre or yacht colour scheme

Steps:

Sustainably sourced teak

Technical information

Dimensions	5 Step	6 Step	7 Step	8 Step	9 Step
Housing width (mm) - A:	982	982	982	982	982
Housing height (mm) - B:	282	282	282	282	282
Housing length (mm) - C:	2290	2596	2902	3208	3514
Step width (mm) - D:	620	620	620	620	620
Bottom of stairs to top step height (mm) - E*:	1372	1657	1942	2227	2512
Operating system:	Hydraulic	Hydraulic	Hydraulic	Hydraulic	Hydraulic

*Lower 3 steps require 800mm under waterline
